

I am concerned that the new Low Power FM service expansion will take priority over current FM translator service which allows me to listen to K-LOVE locally on channel 91.9 FM. This channel brings a very loving and beneficial message to me and my community. I think this channel brings hope and purpose to many people that don't have this in any other part of their lives. Without it I think many more people will fall into dispair and therefore be a detriment to themselves and/or the community as a whole. Please don't expand LPFM which could cause our community to not be able to listen to such a positive message. Thank-you!
